

OVERHEAD STEEL STRUCTURE ASSEMBLY
DESIGN & FABRICATION SERVICE

GENERAL APPLICATION:

Hollister-Whitney Elevator Corporation is now offering to its customers the service of design and fabrication of the Overhead Steel Structure Assembly required for their elevator project. This “Turnkey Service” opportunity will professionally design, fabricate and supply all of the overhead steel components including beams, channels, plates, clip angles and associated structural hardware ready to mount to the customer-supplied wall pocket bearing plates and/or building structure attachment points.

SPECIFICATIONS:

This Overhead Steel Structure Assembly Package complies with the following specifications:

- ASME A17.1 Safety Code for Elevators
- AISC Steel Construction Manual
- AWS D1.1 Structural Welding Code
- All bolted design which requires no field welding

If interested, please contact HWEC to supply pricing information for your consideration.
